

ASHISH KUMAR GIRI

AWS DevOps Engineer | Terraform & IaC | Kubernetes (EKS) | CI/CD | Site Reliability Engineering

India | +91-6372306709 | ashishgiri1948@gmail.com | [linkedin.com/in/ashish-kumar-giri](https://www.linkedin.com/in/ashish-kumar-giri)

PROFESSIONAL SUMMARY

AWS DevOps Engineer with 4+ years of experience automating and running cloud-native AWS infrastructure for large regulated enterprises. Hands-on with Terraform (IaC), Amazon EKS/Kubernetes, AWS networking services and CI/CD on GitHub Actions and Jenkins. Applies Site Reliability Engineering practices — centralized observability, automated alerting, incident response — to keep production systems highly available; cut MTTR by 30% and AWS spend by 25% while delivering in Agile/SDLC teams.

TECHNICAL SKILLS

- **Cloud (AWS):** EC2, VPC, ALB/NLB, Route 53, S3, RDS, CloudFront, Lambda, IAM, EKS, CloudWatch, Auto Scaling
- **AWS Networking:** VPC design & subnetting, route tables, NAT/Internet gateways, security groups & NACLs, ALB/NLB
- **Infrastructure as Code:** Terraform (modules, S3 remote backend, DynamoDB state locking), AWS CloudFormation
- **Containers & Orchestration:** Docker, Kubernetes (Amazon EKS), Helm charts, multi-AZ cluster operations
- **CI/CD & Automation:** GitHub Actions, Jenkins, GitOps, container build pipelines, blue/green & rolling deployments
- **SRE & Observability:** Prometheus, Grafana, CloudWatch, automated alerting, dashboards, incident triage, RCA
- **Security & Governance:** IAM least privilege, AWS Secrets Manager, account baselines, tagging & compliance
- **Scripting & OS:** Bash, Python, PowerShell, YAML, AWS CLI, Linux administration
- **Ways of Working:** Agile/Scrum, SDLC, requirement analysis, effort estimation, Git/GitHub, cross-functional collaboration

PROFESSIONAL EXPERIENCE

Cognizant Technology Solutions

Kolkata, India

Technical Lead - DevOps Engineer

Jul 2022 - Present

Client: Sanofi (Current)

- **Automated multi-account AWS provisioning across 200+ environments** with Terraform, using an S3 remote backend and DynamoDB state locking for consistent, conflict-free deployments.
- **Built reusable Terraform modules** for VPC, EKS, IAM roles and ALB, **cutting manual provisioning effort by 40%.**
- **Operated highly available multi-AZ Amazon EKS clusters**, improving resiliency for containerized microservices.
- **Implemented end-to-end CI/CD pipelines in GitHub Actions** with automated build, test and zero-downtime blue/green deployment to EKS.
- **Reduced MTTR by 30%** with centralized observability on Prometheus, Grafana and CloudWatch plus automated alerting.
- **Cut monthly AWS spend by 25%** via Savings Plans, EC2 rightsizing and S3 lifecycle policies.
- **Reduced infrastructure-ticket SLA breaches by 40%** in L2/L3 support, and **cut manual data processing by 50%** with a GenAI-assisted automation.
- **Translated functional and non-functional requirements into infrastructure specifications** with application, security and QA teams, contributing effort estimates for sprint planning.

Client: AstraZeneca

- **Automated AWS account baseline setup** (IAM policies, VPC, logging, security controls) on a multi-account Terraform architecture with dev/stage/prod separation, **cutting new account setup from 2 days to 2 hours.**
- **Administered AWS compute and networking** — instance allocation, load balancer configuration and performance monitoring.
- **Automated resource tagging** with PowerShell and YAML, improving cost visibility, compliance reporting and utilization.
- **Collaborated with cross-functional Agile teams** to improve pipeline reliability and automation coverage.

CERTIFICATIONS

- **AWS Certified Solutions Architect – Associate (2024)** | **AWS Certified Cloud Practitioner (2023)**

EDUCATION

B.Tech – Chemical Engineering, GIET University, Odisha

2018 – 2022 | CGPA: 8.66/10
