

ASHISH KUMAR GIRI

DevOps Engineer

India | +91-6372306709 | ashishgiri1948@gmail.com | LinkedIn: [/ashish-kumar-giri](#)

PROFESSIONAL SUMMARY

DevOps Engineer with 3+ years of experience designing and automating cloud-native infrastructure on AWS. Skilled in infrastructure provisioning using Terraform (IaC), Kubernetes (EKS) cluster management, and CI/CD pipeline automation. Experienced in building highly available and scalable production systems with a strong focus on reliability, automation, cost optimization, and security.

TECHNICAL SKILLS

- **Cloud:** AWS (EC2, VPC, ALB, RDS, EKS, IAM, S3, CloudFront, Lambda, Route53)
- **Infrastructure as Code:** Terraform (IaC), Aws CloudFormation
- **Containers & Orchestration:** Docker, Kubernetes (EKS), Helm charts
- **CI/CD:** GitHub Actions, GitOps, Jenkins, Docker build pipelines, blue/green & rolling deployments
- **Monitoring:** CloudWatch, Prometheus, Grafana, Virtual Machines
- **Security:** IAM least privilege, Secrets Manager, security groups, VPC isolation
- **Scripting:** Bash, Python, powershell, Aws CLI, Linux
- **Version Control:** Git, Github

PROFESSIONAL EXPERIENCE

Cognizant Technology Solutions

Technical Lead – DevOps Engineer | Jul 2022 – Present | Kolkata

Client : Sanofi (Current)

- Designed and automated multi-account AWS infrastructure across 200+ environments using Terraform, leveraging S3 remote backend and DynamoDB state locking to ensure secure and consistent infrastructure provisioning.
- Built reusable Terraform modules for VPC, EKS clusters, IAM roles, and ALB configurations, reducing manual provisioning effort by 40%.
- Designed and deployed highly available Amazon EKS clusters across multiple AZs, improving application resiliency and enabling containerized microservice deployments.
- Designed and implemented end-to-end CI/CD pipelines using GitHub Actions for containerized microservices, enabling automated build, testing, and deployment to Amazon EKS with zero-downtime deployment strategies.
- Resolved server provisioning and configuration issues, ensuring timely availability and reducing ticket resolution SLA breaches by 40%.
- Implemented infrastructure automation using Terraform modules and environment-based configurations (dev/stage/prod), significantly improving infrastructure consistency and reducing provisioning time.
- GenAI implementation led to 50% reduction in manual data processing time, significantly improving support ticket handling and operational efficiency for client-facing services.
- Optimized AWS costs by implementing Savings Plans, EC2 rightsizing, and S3 lifecycle, reducing monthly spend by 25%.
- Reduced Mean Time to Recovery (MTTR) by 30% by implementing centralized observability using Prometheus, Grafana, and AWS CloudWatch with automated alerting and real-time monitoring dashboards.

Client : AstraZeneca

- Assigned and managed AWS server, monitored performance, configured load balancing, and resolved login issues.
- Implemented automated account baseline setup including IAM policies, VPC, logging, and security controls.
- Multi-Account AWS Infrastructure Automation
- Designed Terraform architecture using environment separation (dev/stage/prod).
- Collaborating with cross-functional teams to proactively improve pipeline reliability and Automation.
- Reduced new account setup time from 2 days to 2 hours.
- Automated tagging processes using PowerShell scripts and YAML, improving resource organization and compliance.
- Analyzed resources data using names and resource groups to optimize cloud resource management.
- Implemented Agile methodology to improve collaboration and deliver high-quality AWS-based solutions.

CERTIFICATIONS

- AWS Certified Solutions Architect – Associate (2024)
- AWS Certified Cloud Practitioner (2023)

EDUCATION

- **GIET University, Odisha**
- B.Tech – Chemical Engineering | 2018 – 2022 | CGPA: 8.66 / 10
